

J. Pelegrin
**A Turning Point
In USAs Future**

(A Battle for Survival)

The United States of America's Political and economic World predominance has made it the primary destination for migrants around the World. The past Biden Administration invited millions of foreigners, unvetted and unidentified, aiding their spread across the country, helping them with money, transportation, and healthcare. In the end, around 2.000.000 invaders are presently in the land; nobody knows where, their IDs or intentions: maybe, some are Terrorists and/or criminals.

The weakness created by the previous Administration encouraged two traditional enemies, Islam and Communist China, to aggressively try to displace the USA and take over the World. Islam, religiously, and China, globally, militarily, and commercially. Note, they are also incompatible with each other.

Nonetheless, Islam has proven to be the most significant, dangerous enemy; **Nigeria, South Africa, Syria, Australia, and 9/11** are proof.

It is a religious, massive group with millions of fanatic followers, many violent, around the World, with only one goal in mind as written in the Koran: Convert the whole World population to Islam. If they resist, kill them where you find them. Textual words in the "Holy Book." Are we going to stay passive and surrender, or be killed, as they did in Syria, Nigeria, Australia, and else?

The author is providing insightful information based on history, Vedic knowledge, and Science, indispensable to repeal them and defend our country, our homes, and our families.

Our country and the World are aiming for survival! The **stand-your-ground law**, also called a "**line in the sand**" or "**no duty to retreat**" law, should be applied now! **We must stand our ground to defend our land!**
